[linkedin.com/in/perla-soumya](#) · Hyderabad, India

I design and develop products for founders and startups. Three years as an enterprise developer at Tata Steel, now designing AI-assisted products and shipping them myself, from the first user journey to live production code.

EXPERIENCE

Freelance Product Designer & Builder

2024 – Present

UX Gym (Skanuvi Edtech) · learning platform for a design mentorship program

- Designed and built the entire platform solo, from idea to tested production in one month. Within two months it was running **300+ students across 3 batches**, with new batches joining.
- Cut the time to review 30 students' projects from **a week to 2 days**, and admissions from **5 days to 4 hours**. Engagement rose from **60% to 80%** by the fourth month.
- Turned static workbooks into interactive canvas exercises that **80–100% of students finish**; a ready-to-post export lifted LinkedIn sharing from **20% to 80%**, bringing thousands of leads without ads.
- Built a page builder that cut module creation time by about 80%, and a preview mode so the founder sees every screen as a student will.

UX Gym · AI UX four-day live launch

- Designed and built solo a launch the founder ran from his phone, switching 16 site states live: **1,016 attendees** and **25% more paying customers** than the previous year.
- Designed a live funnel dashboard showing arrivals and drop-off; **53.3%** of day one's audience stayed through all four days to the offer.

Other clients

- Pococare: company profile and brochure, used as a sales and investor piece. S.S. Prime pens: Instagram campaign concepts.

Developer & Manager · Tata Steel

Aug 2021 – Feb 2024 · Hyderabad

- Transit Guest House app**: designed and built end to end; about 3,000 bookings a month and **30,000 people a year**, with automated room assignment replacing manual booking.
- CAM Delegation System**: designed an interface for 2,000+ customer account managers to delegate work during leave, cutting customer management time by **30%**.
- Net Margin Forecasting (feature lead)**: SAP solution predicting net margins for about 600,000 orders a year.
- Recognised as one of the top 2 of 50 performers for ahead-of-schedule delivery; special team award (2023).

PERSONAL PROJECTS

- Context-aware dictionary (Chrome extension)**: gives the one meaning that fits the sentence, including email shorthand and Hinglish. [Demo](#)
- ClearLens**: an accessibility browser extension, vision-first MVP (2026).
- Rapido "Plan & Explore" concept**: top 7 of 99; Best Performer Award, UX Gym Ignite (2025).

SKILLS

Design: UX research, journey mapping, wireframing, prototyping, usability testing, design systems, interaction and motion design, visual storytelling

AI-native: AI-assisted prototyping, image and video generation, human-in-the-loop AI interfaces

Tools: Figma, Miro, Jitter, Illustrator

Build: Next.js, React, Prisma, HTML/CSS/JS, Java, Spring Boot, SQL, SAP ABAP

EDUCATION

B.Tech, National Institute of Technology, Warangal · 2021 · Google UX Design Certificate · 2025
